A charming country house set on a plot of approximately 1,100 m² (one *tahúlla*), combining the charm and character of a traditional home with the comforts of a comprehensive renovation. Originally built in 1975, the house underwent a complete renovation that was finished in 2024. The project included updating all interior systems—such as plumbing and electrical wiring—as well as modernizing the home's various living areas. The main floor features a spacious living-dining room, a master bedroom, a bathroom with a shower, and a fully equipped kitchen. Notable highlights include the high ceilings and exposed beams, which preserve the property's rustic country essence while blending seamlessly with the renovation's contemporary style. The upper floor houses two additional bedrooms and a toilet, providing a comfortable, private space for family or guests. Outdoor amenities include a swimming pool, a poolside bathroom, a storage room, and a covered carport to keep vehicles protected from the sun. This is a truly charming home that successfully preserves the style of an authentic country house while incorporating the modern comforts of a recent renovation.
